APPLICATION PERIODS

Exchange students
February 22nd to April 25th 2021
for Fall Semester or Academic Year 2021-2022

September 13th to October 17th 2021
for Spring Semester 2021-2022

4th year Double Degrees
February 22nd to April 25th 2021

3rd year Double Degrees
February 22nd to April 25th 2021

FITEC / SCS China / Tohoku
double degrees applicants
February 22nd to April 4th 2021

ACADEMIC PERIODS

Fall Semester
Monday, September 13th 2021
Friday, January 28th 2021

Spring Semester
Monday, January 31st 2021
Friday, June 17th 2022
FRENCH: INTENSIVE LANGUAGE COURSES
Summer school for exchange and double degree students
August 19th to September 10th 2021
3-week course | 4 ECTS
Includes courses, housing and catering for €390 only!
ecole-ete.insa-lyon.fr/en

Winter school
January 20th to 29th 2022
2-week course (40hours) | 2 ECTS
€100
fle.insa-lyon.fr/en/content/ecoles-dete-et-dhiver

International students can also attend intensive French-language courses throughout the academic year: on average 2 hours per week, totally free of charge

CIVIL & HOUSING LIABILITY POLICY
Every student has to get liability coverage in France (e.g. SMERRA or LMDE)

CATERING
INSA Lyon restaurants are open 7 days a week (except Saturday evenings and Sunday mornings)
www.insa-lyon.fr/en/catering

ACCOMMODATION
INSA Lyon provides accommodation on-campus for all exchange students €360 to €550 / month
www.insa-lyon.fr/en/residences

HEALTH INSURANCE
Students from EU countries must have their European Health Insurance Card (EHIC) valid for the period of their stay in France. If not, they will have to subscribe to the French Social Security.

Students from non-EU countries have to subscribe to the French Social Security via etudiant-etranger.ameli.fr

All students attending the summer school must have their own health insurance from their arrival to the beginning of the academic year (in September)
ENGINEERING COURSES TAUGHT IN ENGLISH AT INSA LYON
FOR EXCHANGE STUDENTS

2021-2022
INSA Lyon offers a wide range of courses in Science & Technology, from undergraduate level up to PhD. High proficiency in Science and Technology combined with a humanistic lens and openness to the society and the world are key values of the INSA education model. More than 1000 students graduate every year from INSA Lyon, hired by companies worldwide.

The INSA curriculum is a 5-year program and leads to the « Diplôme d’ingénieur », equivalent to a Master of Science. It is divided into two tracks:
- Year 1 and 2: a common track for all engineering students to ensure strong fundamental knowledge
- Year 3, 4 and 5, organized in 9 engineering fields named Departments.

Exchange students are welcome to all INSA Lyon Departments. A majority of courses have to be taken in one of the 9 Departments, then additional courses can be chosen in another. One semester cannot exceed 30 ECTS credits. On average 1 ECTS credit = 20 hours of lectures in-class and personal work. Exchange students can simulate their choice of courses prior to coming to INSA Lyon on: exchange-student.insa-lyon.fr

Company internship opportunities are available following one academic semester. The internship is carried out under the supervision of a Department with international students keeping their exchange student status and visa. Each Department has its own organization and network among the numerous global companies and SMEs located in our region, ranking first for industry in France.

INSA Lyon is also a research center with more than 600 researchers working in 23 laboratories, combining education activities and close links with companies and public authorities. It promotes a cross-disciplinary approach towards 5 main societal challenges:
- Digital Society and Information
- Energy for a Sustainable Development
- Environment: Natural, Industrial, and Urban Environments
- Global Health and Bioengineering
- Transport: Structures, Infrastructures, and Mobilities

www.insa-lyon.fr/en/research

French as Foreign language
INSA Lyon has its dedicated language center. Among 10 languages, French as a Foreign language (FLE) is taught by a professional team. Summer school and semester courses are available for international students and are strongly recommended even though they choose courses taught in English.

INSA Lyon was recently qualified again with the highest rate (3*) delivered by the French Government.
The Department of Biosciences trains multidisciplinary engineers, intended to be project managers, specialized in Healthcare, Agro-food and Environmental industries.

2 main training programmes are offered in the Department:
- Biochemistry and Biotechnologies provides engineers with a solid scientific and technical background in Life Sciences and Healthcare; shapes them to work in Environmental, Pharmaceutical, Agro-Food and various other fields of chemistry; trains them for management positions, quality control and consulting in industries.
- Bio-Informatics and Modeling, designed in collaboration with the University Claude Bernard Lyon 1, trains engineers to be interfaces between biologists, mathematicians and computer scientists; analyze and process biological data, extract relevant information and model biological systems in order to understand the processes of life.

CIVIL ENGINEERING AND URBAN PLANNING

The Department of Civil Engineering and Urban Planning provides education in the scientific and technical fields of civil engineering and urban planning:
- Building Design, Construction and Management
- Infrastructure Design, Construction and Management
- Urban Development and Renovation.

Major scientific fields addressed: Geotechnics; Material and Structural Analysis; Heat and Mass Transfer; Indoor and Outdoor Acoustics and Lighting; Heating, Ventilation, and Air Conditioning (HVAC); Building Energy Management; Water Management and Hydraulics.

A particular attention is paid to cross-disciplinary fields of study: Engineering and Management Tools; Environmental Science; Humanities; Economics and Social Science.

INDIVIDUAL PROJECT 15 ECTS

Bachelor degree level
The topic and program are defined with a mentor from the Department and are related to Civil Engineering.

RESEARCH AND DEVELOPMENT PROJECT FULL TIME 30 ECTS / HALF TIME 15 ECTS

Master degree level
The project aims at developing the following knowledges and abilities:
- Understand the nature of R&D activities and challenges for innovation;
- Acquire advanced knowledge in some fields of civil engineering and urban planning, and/or acquire knowledge in complementary fields;
- Discover the limits between well founded knowledge and incomplete/uncertain knowledge;
- Implement scientific principles and methods on a specific research project;
- Develop general abilities (project management, writing reports and scientific papers, oral communication, etc.)

The subject and program are defined with a mentor from the Department and are related to:
- Heat & Mass Transfers in Buildings
- Materials and Structures
- Soils, Geo-materials
- Urban Techniques & Society (a good level of French can be required - for this domain only)
- Urban Water Management

The Department of Electrical Engineering trains multidisciplinary engineers in the field of electrical systems. This training provides students with theoretical and practical knowledge in Electronics, Electrotechnical engineering, Automation, Industrial Informatics and Telecommunications (EEAIIT). Activities related to EEAIIT include: electronic systems for professional and public environments, integrated circuit design, energy production and management, control and supervision of production systems, information technology, telecommunications equipment, network operators...

**SEMESTER 1, SEMESTER 2**

**TECHNICAL PROJECT** 3 ECTS

The project is carried out by a group of students (2 or 3) and covers various aspects of Electrical Engineering. The aim is to design, carry out, test and validate a device or an electrical system defined by a customer. Through this project, students develop initiative and autonomy skills but also their ability to defend their choices and results.

**RESEARCH PROJECT** 20 ECTS

Master degree level

The research project takes place in one of the labs associated to the Electrical Engineering Department. An experienced teacher will mentor the student. Topics are most of the time raised by the researcher himself or in collaboration with companies.

ECTS = European Credits Transfer System
The Department of Energy and Environmental Engineering (GEn) of INSA Lyon offers training opportunities for future professionals, operating in the fields of energy and environmental sciences. The multi-skill academic program enables our students to work in various sectors including energy production and supply, energy efficiency, HVAC and building energy performance, energy consulting, process engineering, waste management, etc.

**SEMESTER 1 [SEPTEMBER - JANUARY], SEMESTER 2 [FEBRUARY - JUNE]**

**RESEARCH AND DEVELOPMENT PROJECT 25 OR 30 ECTS**

This internship is an initiation to scientific research carried out under the supervision of an experienced researcher. It aims to deepen knowledge and abilities in a research problem in scientific English, and to develop experimental or computational skills. At the end of the internship, the student is expected to demonstrate that he/she can conduct a research project and that he/she has learned how to work independently in a research team. It requires creative, self-critical and communication skills. The project is carried out in one of the following themes: energy, heat transfer (CETHIL laboratory) or environmental sciences in waste, water and soil (DEEP laboratory).

**SEMESTER 1 [SEPTEMBER - JANUARY]**

- Challenges and opportunities in environmental management 4 ECTS
- Energy transition and circular economy: waste & biomass resources 5 ECTS
- Energy transition: from fossil fuel to renewable energy - Energy market 8 ECTS
- Wastewater treatment 3 ECTS
- Energy optimisation 2 ECTS
- Numerical analysis using EXCEL/VBA 5 ECTS
- Numerical methods using Matlab 2 ECTS
- Research and development project 25 or 30 ECTS
- Short research project 15 ECTS

**SEMESTER 2 [FEBRUARY - JUNE]**

- Computational fluid dynamics software 2 ECTS
- Chemical engineering simulation software 2 ECTS
- Numerical analysis using Matlab 2 ECTS
- Research and development project 25 or 30 ECTS
- Short research project 15 ECTS

ECTS = European Credits Transfer System
Industrial engineering concerns production systems, supply and/or distribution of goods or services, their design, implementation, management and improvement with a systemic vision. Industrial engineers are multidisciplinary. They are production managers, able to design, implement and manage complex industrial systems while considering all the technical, organizational, financial and human factors. They are involved in organizing the company in accordance with the principles of sustainability. They apply their skills to improve performance, quality and safety.

### RESEARCH PROJECT

**FULL TIME 30 ECTS / HALF TIME 15 ECTS**

The reception and supervision of students takes place in a scientific laboratory. The student works on a well-defined scientific problem, following a project approach, which requires managing objectives, planning, monitoring and deliverables. The host laboratories are DISP and AMPERE. Available on application and selection, and depending on subject availability.

> Contact: gi@insa-lyon.fr

ECTS = European Credits Transfer System
The Department of Mechanical Engineering aims to train mechanical engineers in the fields of innovation, R&D and product design and manufacturing. They develop the capacity to carry out major projects, from an original idea to an end product.

2 sites: one on the main campus LyonTech-La Doua and the other in Oyonnax, in the heart of the Plastics Vallée. Therefore, some courses take place on the Oyonnax campus.

Areas of activity: energy, transports, biomedical and health, sports and leisure, mechatronics and robotics, luxury industry, mechanical constructions and industrial machinery, eco-industry, buildings, plastics processing...

ECTS = European Credits Transfer System
The Department of Computer Science and Information Technology (IF) offers a general and wide-ranging training recognized among the best in the field in France. All the IT areas are covered (industry, management and science) with emphasis on engineering activities, modelling and integration of complex systems. According to INSA Lyon model core values, students also acquire the foundations of complementary disciplines like teamwork, project management, customer relation and proficiency in foreign languages.

Each promotion is sponsored by a large company. IT graduates work in many sectors such as consulting and software firms, software publishing, large companies in the tertiary sector, computer hardware, etc. They generally occupy positions as research engineers, project managers, experts, consultants, architects or entrepreneurs.

**SEMESTER 1 (SEPTEMBER - JANUARY)**

- Security and advanced networks  
  2 ECTS
- Data Analytics & Machine Learning  
  6 ECTS
- Privacy and Ethics  
  6 ECTS
- Parallel and GPU computing  
  6 ECTS
- Cloud Computing and Distributed Systems  
  6 ECTS
- Cybersecurity - blockchain and secure multiparty computation  
  6 ECTS
- Programming infrastructure and paradigms for Big Data  
  6 ECTS

**SEMESTER 2 (FEBRUARY - JUNE)**

- Software Engineering and Modelling  
  3 ECTS
- Data Management for the Web  
  2 ECTS

**SEMESTER 1, SEMESTER 2**

**RESEARCH PROJECT**  
10, 20 OR 30 ECTS

The research project takes places in one of the labs associated to the Department. An experienced teacher will mentor the student. Topics cover almost all the areas of computer science. Exchange students have to precise their subject to their academic advisor in the Department. They can choose the duration and the amount of work they want to dedicate to their project, so they can take other courses. Therefore different amounts of ECTS credits can be assigned to the research project.

**LIRIS** - Computer Science Laboratory for Image Processing and Information Systems  
liris.cnrs.fr

ECTS = European Credits Transfer System
The Information Science & Technology Semester is a program jointly organized by 3 engineering departments of INSA Lyon:
- Telecommunication Department
- Computer Sciences and Engineering Department
- Electrical Engineering Department

In collaboration with 3 research laboratories: CITI, CREATIS, LIRIS.

A full IST semester program is composed of six scientific courses [to be chosen out of 12] associated to a research project, conducted in one of the 3 research laboratories and which develops high level research in the fields covered by the IST semester. Note that, the French language course (2 hours per week) is given all throughout the semester in parallel to these courses and projects.

ECTS = European Credits Transfer System
The Department of Materials Science and Engineering (SGM) trains general engineers whose competencies range from the conception to the manufacturing of built-up products in advanced technology industries. Those industries concern the fields of advanced materials (semiconductors, metals and alloys, polymers, composites, ceramics) and micro and nanotechnologies components. Materials engineers take part in research and development, design, production, quality in different fields such as the industry of electronic components, petrochemistry, iron and steel industry, automotive, aeronautics, construction, energy, packaging, biomedical, cosmetics etc.

### SEMESTER 1 [SEPTEMBER - JANUARY]

- **Physics of Materials – Solid state physics** 3 ECTS
- **Electronics - Electronic circuits Signal Systems** 3 ECTS
- **Mechanics – Elasticity and beam mechanics** 2 ECTS
- **Material Mechanics – Mechanical behaviour of materials** 4 ECTS
- **Materials engineering – Material selection** 2 ECTS
- **Nanotechnology – Nanofabrication of advanced integrated circuits** 2 ECTS
- **Optoelectronics – Photonic materials and components** 2 ECTS
- **Microelectronics Integrated Electron Devices** 2 ECTS
- **Nanotechnology and Semiconductors** 2 ECTS
- **Chemistry – Polymer formulation and blends** 2 ECTS
- **Materials and Life Science - Biomaterials** 2 ECTS
- **Material Mechanics - Mechanics of Architectured Materials** 2 ECTS

- **Finite Elements Simulation** 2 ECTS

### SEMESTER 1, SEMESTER 2

**RESEARCH PROJECT**

**FULL TIME 30 ECTS / HALF TIME 15 ECTS**

The research project will take place in a laboratory associated with the Department of Materials and Engineering. The student will be mentored by an experienced teacher. Topics are mostly suggested by a company.

Examples of defended thesis:
- Simulation of hip implants: optimization of the shape of the implants according to the patient
- 3D manufacturing of metals by robocasting
- Effect of an applied current on phase transformations.

ECTS = European Credits Transfer System
Telecommunications are at the heart of contemporary human activity. The Telecommunications department (TC) covers all the telecoms professions, from signal processing, to connected objects, the development of Web applications, and the setting up of digital networks. Our future engineers contribute to the development of the internet of tomorrow with societal issues related to security, respect for privacy and respect of the environment.

The courses listed below are taught at a Master degree level and they aim the acquisition of advanced skills, taught as part of 32-hour options covering various themes such as Internet of Things, quantum computing or 5G.

**TELECOMMUNICATIONS**

**SEMESTER 1 [SEPTEMBER - JANUARY]**

**LEAN START-UP INNOVATION PROJECT (PILS) 12 ECTS**

Master degree level

The objective of the PILS project is to allow the students of the Telecommunications department to set up, execute and present an innovative project carried out during the whole first semester of their 5th year. The team is a group of 5-7 students that follows LeanStartup methodology. (Some project meetings may be in French).

**SEMESTER 2 [FEBRUARY - JUNE]**

**RESEARCH PROJECT 30 ECTS**

Master degree level

The exchange students will work closely with a faculty member on a project which is related to the research activities in one of the associated labs to the Department listed below.

INSA SHORT PROGRAMS

INSA Lyon offers international students the possibility of a short stay on its vibrant campus, located in France’s Capital of Gastronomy and European Capital of Smart Tourism in 2019. During the program students will gain experience in innovative scientific fields, develop social science skills and learn French. INSA Lyon short programs give them credits and lead them to open themselves to others, in a multicultural environment. Participants agree that INSA Lyon short programs gave them a stepping stone for further studies and a boost for their career.

SMART LYON - MARCH

2 weeks - 2 ECTS

• COURSES (30 CONTACT HOURS)

1. Smart Cities
2. French as a foreign language

• ACTIVITIES

Cultural visits in Lyon and surroundings, social activities organised by students associations.

> For further information: www.insa-lyon.fr/en/smart-lyon

ECTS = European Credits Transfer System
ENGER'INSOA - JUNE

3 weeks | 4ECTS credits

• COURSES (60 CONTACT HOURS)

1. Energy
   - Introduction to Energy Transition
   - Renewable Production and Platform Group Project

2. French Language, cross cultural communication

• ACTIVITIES

Guided visit of Lyon, day trip to the Alps, cooking activity, dinner to a typical restaurant and much more!

> For further information: https://www.insa-lyon.fr/en/energ-insa
INSA SHORT PROGRAMS

INNOV@INSA - MAY-JUNE
4 weeks | 6 US / 12 ECTS credits
• COURSES (90 CONTACT HOURS)
  1. Connected devices and Smart devices
  2. Management and Innovation in Europe
  3. French language, cross-cultural communication, industry and society

Students have to choose between track 1 or 2. Track 3 is mandatory.

INNOV@INSA - JUNE-JULY
4 weeks | 12 ECTS credits
• COURSES (90 CONTACT HOURS)
  1. Management and Innovation in Europe
  2. French language, cross-cultural communication, industry and society

• ACTIVITIES
  Cultural visits in Lyon and surroundings, social activities organised by students associations.
